# NAVEEN KUMAR N

Telco Cloud Operations Engineer

naganaveen2516@gmail.com
+91 8015380210
linkedin.com/naveen-kumar-n-165864208

## TECHNICAL SKILLS

**Cloud Service**

OpenStack (Private Cloud), AWS, Azure

**Operating System**

Linux (Red Hat)

**Networking**

Cisco ACI, APIC, Static Port Binding

**Automation & DevOps**

Bash Scripting, Cron Jobs, CI/CD (CodePipeline), CloudFormation, Infrastructure as a Code

**Monitoring**

Dynatrace, Splunk, Panorama, AVI (NXS ALB), Netops

**ITSM & Collaboration**

ServiceNow (Incident/Change/Problem), RCAs

**Storage & Hardware**

Ceph Storage, NFS, LVM, HP/Dell Servers, BIOS Firmware upgrades, iDRAC

**Tools**

Git, Netbox, Targetprocess, MS Excel

## INTERESTS

DevOps & Kubernetes

Site Reliability Engineering (SRE)

Generative AI

OpenShift

UiPath RPA

## AWARDS

**2Good**

Recognized for exceptional client delivery and sustained performance excellence over two consecutive years, driving improved client retention and reduced churn for HCLTech's Proximus account.

**Microsoft North Star 2025**

Issued by Microsoft - Associated with HCLTech

**Microsoft North Star 2024**

Issued by Microsoft - Associated with HCLTech

## SUMMARY

Telco Cloud Operations Engineer with 3+ years of experience in OpenStack, Linux, and telecom cloud environments. Proven track record of managing 2,000+ VM migrations with zero downtime, optimizing cluster performance, and resolving production incidents. Skilled in automation, cloud operations, and high-availability infrastructure.

## EXPERIENCE

HCLTech – Client: Proximus — Madurai, Tamil Nadu

Telco Cloud Administrator — September 2023 - Present

• Spearheaded live migration of 2,000+ VMs across NFVi/OpenStack clusters with zero downtime, ensuring uninterrupted telecom operations in a 24/7 production environment.

• Redeployed Ceph OSD configuration across 60+ OSDs, reducing storage fragmentation and improving I/O performance and capacity utilization across the storage cluster.

• Executed scale-in (40+ nodes) and scale-out (20+ nodes) operations on OpenStack Nova compute clusters, improving cluster efficiency by ~20%

• Managed 100+ OpenStack resources (Nova images, flavors, Keystone quotas, Neutron networks), reducing provisioning time by 30%

• Implemented Cisco ACI static port binding across tenant networks using APIC, improving deployment accuracy and reducing misconfigurations by 25%

• fMonitored ACI fabric (Leaf/Spine topology) and resolved Neutron/ACI network issues via APIC CLI, achieving 99.9% uptime

• Resolved 50+ incidents/month using RHEL Linux and OpenStack CLI (Nova, Neutron, Cinder), improving SLA compliance by 35% and reducing MTTR

• Automated routine NFVi operations using Bash scripting and Cron Jobs, reducing manual operational effort by 20%

• Managed Cinder volume lifecycle operations (create, attach, detach, snapshot) for 500+ VNF instances, ensuring data reliability and storage performance

• Diagnosed hardware failures on HP/Dell servers (iDRAC, BIOS) and coordinated with cross-functional teams (Cisco, Broadcom) to resolve critical production incidents

• Reduced critical incidents by 40% through proactive monitoring using Dynatrace and Splunk, performing daily health checks across the NFVi infrastructure

• Performed BIOS and iDRAC firmware upgrades on 50+ HP/Dell servers, enhancing system stability.

• Participated in OpenStack cluster upgrade activities including pre-upgrade validation, post-upgrade health checks, and rollback planning to ensure zero-impact deployments

## CERTIFICATIONS

AWS Certified DevOps Engineer - Professional

AWS Certified Solutions Architect - Associate

Microsoft Azure Administrator Associate

Red Hat OpenStack Administration

Oracle Cloud Infrastructure & AI Associate

ITIL®4

Cloud Computing - IIT Kharagpur

## EDUCATION

K.L.N College of Engineering — Aug 2019 - May 2023

Bachelor of Engineering - Electronics and Communication, CGPA: 8.82
